Abstract

This area is for the abstract.

1   Deadline for final paper

Please send us your paper by **November 16th, 2007**, so that we will have time to prepare the proceedings. The proceedings version must be formatted in this style and should not exceed 16 pages.

2   Format

This little template is here to help defining the style of your paper in the proceedings. The proceedings will be formatted for US Letter paper (8.5x11 inches), with top and bottom margins of 2 inches, left and right margins of 2.25 inches, and 10 point characters. The title is set in 12 point font.

2.1   Header

A short title (here *LATEX-Template*) will be used as a running header.

2.2   Additonal packages

You may use any additional packages that are part of a standard teTeX-distribution. If you need anything else, please contact us.

3 Citations

Please use the author-year style from the package `fullname` for citations. The cite command `\namecite{Stabler07}` produces Stabler (2007).

To obtain (Stabler, 2007) use `\cite{Stabler07}`. Please consult the `fullname` documentation for details on optional arguments and further variants of the `\cite`-command.

We provide a BibTEX-style assuming that you will use BibTEX. In the final version of your paper, please do *not* send us a separate `bib`-file. Rather include the bibliography in the LATEX-source by first commenting out the lines
`\bibliographystyle{fullname}`
`\bibliography{mybibliography}`
and then inserting the contents of the `bbl` file like it is done in the source code of this template.
